FOR IMMEDIATE RELEASE

Berkeley, November 27, 2015. MDstaffers is inviting visitors to explore its new website and E-Job Board at www.MDstaffers.com. The new website has been designed to provide the ultimate user-friendly experience with improved navigation and functionality throughout, allowing providers and clients to access detailed information.

The site includes extensive service information to help providers and clients understand MDstaffers' complete range of healthcare staffing and recruiting solutions.

The new website and E-Job Board means that providers and clients can now benefit from richer online content that is easier to navigate and share with others, assisting the specification process. The E-Job Board allows prospective employees to browse jobs based on location and other attributes and apply directly to the job they want; further, this will allow for a faster turnaround for our providers and clients alike. This is a result of talking with both doctors and clients in order to gain valuable insight and feedback.

On the MDstaffers website, visitors can also stay informed with the latest news of the company, and the whole staffing and recruiting industry. The [Press Room](#) section features the latest announcements, product inventions and opinion pieces from industry experts. - See more at: <http://MDstaffers.com/press-room>.

Additionally, the site features a [Document Center](#) which contains all pertinent forms and notices, this enables employees and clients to seamlessly access timesheet and other form templates right from the web.

Please visit the site and send your feedback to info@MDstaffers.com
